

DYNAGRIP®

Nonskid, Nonslip Coatings

Demand a highly flexible, impact-resistant and UV-stable finish: DynaGrip® 2-component urethane coating.

- **Flexible polyurethane non-skid coating**
- **Excellent durability & weatherability**
- **Fine and coarse grits**
- **Excellent wear resistance & coefficient of friction**
- **Excellent chemical & solvent resistance**
- **Good flexibility & impact resistance over a wide range of substrates**
- **Available in a wide range of colors**
- **Designed for roll or spray application**

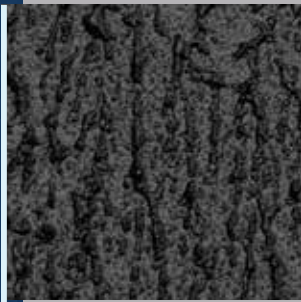

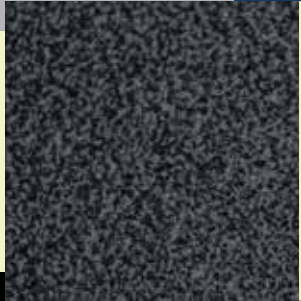

DynaGrip® 50

DynaGrip in 50 Grit (ultrafine). Spray applied using conventional pressure-feed systems for larger production runs, or convenient hand-held off-the-shelf undercoating spray guns. Used to protect surfaces with impact resistance and some slip protection.

DynaGrip® 20

DynaGrip in 20 Grit (fine). Spray applied with conventional pressure-feed systems for larger production runs, or convenient hand-held off-the-shelf undercoating spray guns. Replaces inferior peel-and-stick nonskid tapes known to curl away from substrates over time.

DynaGrip® 15

DynaGrip in 15 Grit (medium-coarse). Roll-applied aggressive surface coating. Lower profile and less rough than found on U.S. Navy ship decks.

DynaGrip® 12

DynaGrip in 12 Grit (coarse). Roll-applied surface coating. Matches to U.S. Navy ship decks' rugged profile and surface roughness.

DYNA GUARD®

Impact resistant, UV Stable

DynaGuard®: NCP's 2-component urethane coating engineered to meet demands for high flexibility, impact resistance and UV stability.

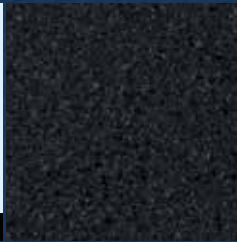

DynaGuard® Smooth

Trailer, agricultural, off-road and heavy duty equipment manufacturers: choose NCP Coatings' DynaGuard® Smooth in your custom colors. Apply using conventional pressure feed, airless or air-assisted airless spray equipment.

DynaGuard Smooth™ is ideal for trailer, agricultural, off-road and heavy equipment manufacturers seeking impact resistance and color retention for their finished goods. DynaGuard Smooth can be formulated in a full range of custom colors to meet your company's or customers' needs.

DynaGuard® OR

For tougher bedliners, choose DynaGuard® OR. Use conventional pressure feed systems or off-the-shelf handheld spray guns to apply. That means no dedicated bedliner spray booth or plural-component equipment required!

When tough bedliner qualities are wanted, consider DynaGuard OR™ (orange peel). No need for expensive plural-component equipment or dedicated bedliner spray booths. For DynaGuard OR, use conventional pressure feed systems for larger production runs. Otherwise, convenient handheld, off-the-shelf undercoating spray guns may be all you need. DynaGuard OR comes in black as a standard color with custom colors available.

APPLICATIONS

- **Trailers**
price point & performance
- **Agriculture/Heavy Equipment**
defends against workplace environmental hazards
- **Recreational Boating**
coatings for aluminum boat market
